OPRA Response Included

# Summary

413 Smith Lane  
Mount Holly, NJ 08060

## Questions?

If you have questions about potentially open or closed permits, **contact your local municipality**. All building permit information should be on record. PermitSearch.com does not manage, resolve, or troubleshoot permit-related issues.

This property has 2 potentially open permit(s)\* and 1 closed permits. Any potentially open permit(s) should be addressed prior to closing.

## Potentially Open Permit(s)

**Permit Number 20210323**

**Effective Date:** 8/19/2021

**Description:** Furnace, A/C, HWH

**Status:** Potentially Open

**Permit Number 20150068**

**Effective Date:** 2/23/2015

**Description:** Security System

**Status:** Potentially Open

\*Permits are classified as potentially open when municipality does not show a permit closed date. Contact municipality directly to determine if permit remains open.

# Summary

413 Smith Lane  
Mount Holly, NJ 08060

## Questions?

If you have questions about potentially open or closed permits, **contact your local municipality**. All building permit information should be on record. PermitSearch.com does not manage, resolve, or troubleshoot permit-related issues.

## Closed Permit(s)

**Permit Number 20100281**

**Close Date:** 6/18/2010

**Description:** Back Flow Preventer, Rain Sensor

**Status:** Closed

**Q: What work requires a permit?**

Permits are generally required for any building, structural, electric, HVAC, and plumbing projects. However, not all work requires a permit. If you have questions about whether work performed required a permit, those questions should be directed to your local municipality.

**Q: What is a potentially open permit?**

If you have a potentially open permit, don't panic. A potentially open permit is a permit which has been issued by a Municipal building department but has not been formally "Closed". Generally, a permit is "Open" until the work is completed and passes inspection (if required). When deemed appropriate, the permit is "Closed" and assigned a closing date.

**Q: What if there are no permits listed on my permit search report?**

No permits listed on your report means there is no recorded history of either open or closed permits.

**Q: Who is responsible to "Close" an "Open" permits?**

If open permits exist and are not closed prior to closing, these permits become the responsibility of the new homeowner. The new owner may be responsible for paying all fees and/or fines and will be forced to complete the pending work.

**Q: How do I close an open permit?**

For you to close a permit, you should contact your local municipality. The municipality may need to send out a building inspector to ascertain whether the work done at the property not only matched the work described in the open permit but complied with municipal building-code requirements.

**Q: What is an OPRA request?**

The term OPRA ("Open Permit Records Act") refers to the statute that provides the public the right to access certain public records including permit information, as well as the process by which that right may be exercised.

**Q: How often is permit data updated by the municipality?**

Each municipality handles permit data in a different way. Some municipalities fully digitize their permit data where it can be accessed by services like PermitSearch. Non-digitized municipalities keep paper records that can be accessed by OPRA request.

## REQUIRED INSPECTIONS

Construction work must be inspected in accordance with the State Uniform Construction Code Regulations N.J.A.C. 5:23-2.18. This agency will carry out such periodic inspections during the progress of work as are necessary to insure that work installed conforms with the requirements of the Uniform Construction Code.

The owner or other responsible person in charge of work must notify this agency when work is ready for any required inspections specified below. Requests for inspections must be made at least 24 hours prior to the time the inspection is desired. Inspections will be performed within three business days of the time for which they are requested. The work must not proceed in a manner which will preclude the inspection until it has been made and approval given.

Required inspections for all subcodes for one- and two-family dwellings are as follows:

1. The bottom of footing trenches before placement of footings, except that in the case of pile foundations, inspections shall be made in accordance with the requirements of the building subcode.
2. Foundations and all walls up to grade level prior to back filling.
3. Utility services, including septic.
4. All structural framing, connections, wall and roof sheathing and insulation; electrical rough wiring, panel and service installation; rough plumbing. The framing inspection shall take place after the rough electrical and plumbing inspections and after the installation of the heating, ventilation and/or air conditioning duct system. The insulation inspection shall be performed after all other subcode rough inspections and prior to the installation of any interior finish material.

Additional required inspections for all subcodes of construction, for other than one- and two-family dwellings, are fire suppression systems, heat producing devices and Barrier Free subcode accessibility, if applicable.

Required special inspections. The applicant by accepting the permit will be deemed to have consented to these requirements:

A final inspection is required for each applicable subcode area before a final Certificate of Occupancy or Approval may be issued. The final inspections include the installation of all interior and exterior finish materials, sealing of exterior joints, mechanical system and other required equipment; electrical wiring, devices and fixtures; plumbing pipes, trim and fixtures; tests required by any provision of the adopted subcodes, Barrier Free accessibility, if applicable; and verification of compliance with NJAC 5:23-3.5, "Posting structures".

A complete copy of released plans must be kept on the job site.

### CERTIFICATE OF OCCUPANCY

This serves notice that said building or structure has been constructed in accordance with the New Jersey Uniform Construction Code and is approved for occupancy.

### CERTIFICATE OF APPROVAL

This serves notice that the work completed has been constructed or installed in accordance with the New Jersey Uniform Construction Code and is approved. If the permit was issued for minor work, this certificate was based upon what was visible at the time of inspection.

### TEMPORARY CERTIFICATE OF OCCUPANCY/COMPLIANCE

If this is a temporary Certificate of Occupancy or Compliance, the following conditions must be met no later than \_\_\_\_\_ or the owner will be subject to fine or order to vacate: **20100281**

### CERTIFICATE OF CLEARANCE - LEAD ABATEMENT 5:17

This serves notice that based on written certification, lead abatement was performed as per NJAC 5:17, to the following extent:

- [ ] Total removal of lead-based paint hazards in scope of work
- [ ] Partial or limited time period ( \_\_\_\_\_ years); see file

### CERTIFICATE OF CONTINUED OCCUPANCY

This serves notice that based on a general inspection of the visible parts of the building there are no imminent hazards and the building is approved for continued occupancy.

### CERTIFICATE OF COMPLIANCE

This serves notice that said potentially hazardous equipment has been installed and/or maintained in accordance with the New Jersey Uniform Construction Code and is approved for use until \_\_\_\_\_
